

## PROJECT PROFILE:

## RETAIL CENTER

Located in Bourbonnais, Illinois, this Walgreens anchors a 7 unit retail center for which Raffin Construction was the general contractor.

After being the successful bidder on the project, Raffin worked with the architect to ensure that the owner's two main concerns were dealt with:

- That the building be aesthetically pleasing and convey the quality of the tenants that were to occupy the building.
- That the project be completed within a tight time frame.

Through effective project management and the use of quality subcontractors Raffin delivered an attractive, well built retail center in time for the holiday shopping season.
