

PROJECT PROFILE:

PUBLIC WORKS FACILITY

Hickory Hills, a city in the south west suburbs of Chicago outgrew their municipal building and contracted for the design of a new building housing their garage, warehouse, and municipal offices. Raffin Construction was the successful bidder on the project. The project consisted of a 20,000 square feet garage and warehouse with about 3,000 square feet of finished office space. The building walls were precast concrete with a structural steel roof frame and a built up roof.

Construction commenced in the fall and was completed by the spring of the following year.
